**Description**
Forbes Marshall insulation jackets are used for preventing any heat energy losses from the body of the moisture separator in service. The insulation jackets for moisture separators are available in ready to mount condition. For flanged connections separate insulation jackets are available.

**Sizes and Pipe Connections**
Available in low temperature version with velcro fitting suitable for moisture separators DN 20,25,40,50,80,100. Also available for higher sizes on request.

**Limiting Conditions**
Maximum metal surface temperature: 220°C

**How to Order**
Example: 1 No. Insulation Jacket for moisture separator size DN50

**Installation**
Once the Moisture Separator is installed the insulation jacket can be fixed as follows.

a) Place the jacket centrally from the side of the separator.

b) Wrap the jacket over separator body and flanged connection and pull the velcro flaps in to secure position.

c) Wrap front and back of jacket around the separator and secure fully by using the side velcro flaps. Finally pull and tie the draw cords to minimize any gap that would allow air to flow or allow ingress of water.

d) Please ensure that the moisture separator drain is open for accessibility.

**Removal**
Before removing the jacket, check if the moisture separator is in service. If it is, then metal surface will be hot enough to burn, so suitable protective clothing (gloves, apron etc.) should be worn. Removal is the reverse procedure to the above.

**Handling**
When the jacket is new the insulation material is fully enclosed within the inner and outer faces and retained by stitching. In this condition no special protective clothing is required. However, if the inner and outer face becomes unstitched or damaged, so as to expose the insulation material then suitable protective clothing (e.g. gloves, safety glasses, face masks and overalls) should be worn when handling.

**Disposal**
This product is not recyclable and is non-combustible. For disposal purpose consider the product to be mineral fibre and dispose off in accordance with local regulations.

**Aluminum coated fiber glass cloth**

**Rock Wool**
