

Low Pressure Regulator

Forbes Marshall Low Pressure Regulator

The Forbes Marshall pressure regulator provides pressure reduction of high pressure samples.

It also provides regulated output pressure irrespective of fluctuations in the upstream pressure conditions.

A built-in relief valve ensures human safety in case of failure. The output pressure can be set anywhere between 0 to 6 Kg/Cm² depending on the field requirement. A higher pressure output range is also available on request.

Features

A precision engineered product

Pressure reduction and regulation in the same unit

Built-in sample pressure relief valve for added safety

Proprietary Forbes Marshall design

Specifications

Stainless steel (SS-316) housing

Set pressure at outlet : adjustable between 0 to 6 Kg/Cm²

Inlet pressure rating: max. 250 Kg/Cm²

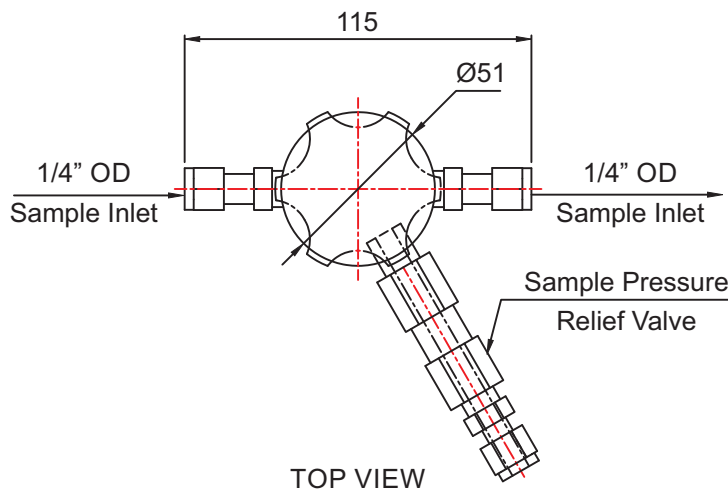

Flow: 100 LPH (max.)

Inlet / outlet connection : 1/4" OD
(Double ferrule compression type)
